## MIT APPROVAL FOR SOFTWARE TO BE DISTRIBUTED BY OPEN SOURCE OR TO BE PLACED IN THE PUBLIC DOMAIN

MIT Case No. 24157LCase Title: Educational Radar Real Time Program (RTP)

Case Authors and Addresses:

Name: Frank C. Robey  
 Address: 144 Riverdale Rd  
Concord, MA 01742

Name: \_\_\_\_\_  
 Address: \_\_\_\_\_  
 \_\_\_\_\_

(names and addresses of additional case authors, if any, provided on attached sheet)

In reliance on the representations made in the completed and delivered form "*Request for Software to be Distributed by Open Source or to be Placed in the Public Domain*", MIT agrees that the software described in the above referenced case shall be:

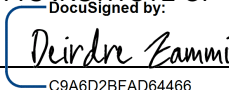

(check one)

- ☐ (i) distributed by open source pursuant to the BSD Two-clause or MIT License, meaning that MIT will retain copyright ownership of the software code (source, object or otherwise) but shall make the software code openly available to the public by internet, worldwide web or like means, without restrictions on use or copying, without any financial consideration to MIT and without the requirement that redistribution of the software include the source code (see Notes 1 and 2 below); or
- ☒ (ii) distributed by open source pursuant to the GNU General Public License ("GPLv2") Version 2 or the GNU Library Public License ("LGPLv2") Version 2 authored by the Free Software Foundation (available at <http://www.fsf.org>), meaning that MIT will retain copyright ownership of the software code (source, object or otherwise) but shall make the software code openly available to the public by internet, worldwide web or like means, without restrictions on use or copying and without any financial consideration, except as allowed under the GPLv2 or LGPLv2 (see Note 3 below), which requires that redistribution of the software (or any modifications) include the source code; or
- ☐ (iii) placed in the public domain, meaning that upon placement in the public domain MIT and the undersigned authors shall not claim, and the undersigned authors represent to MIT that no other person shall have the right to claim, any copyrights in the software code (source, object or otherwise) as it now exists; and the undersigned authors have agreed that placing the software in the public domain will be the most effective way to disseminate the software for public benefit (see Note 4 below).

Please understand that this approval does not waive, relinquish, or grant any rights MIT may have in any patentable or patented invention implemented by the software. In addition, if this software is further developed by your making significant use of MIT-administered funds or facilities such that substantial new functionality is added or a new version is implemented, you must submit a new request if you wish that new development to be placed in the public domain or to be distributed by open source.

**Note 1 (Open Source, BSD Two-clause License):** In this case, MIT retains copyright ownership, but makes the software openly available to the public without the requirement that redistribution of the software include the source code. MIT has approved open source distribution pursuant to the BSD License, which can be found at <http://www.opensource.org/licenses/bsd-license.php>. The license template at that website and the Copyright Notice (Note 5) should be included conspicuously within the released software copy and at the site where the software is downloaded (see Note 6 for Github instructions).

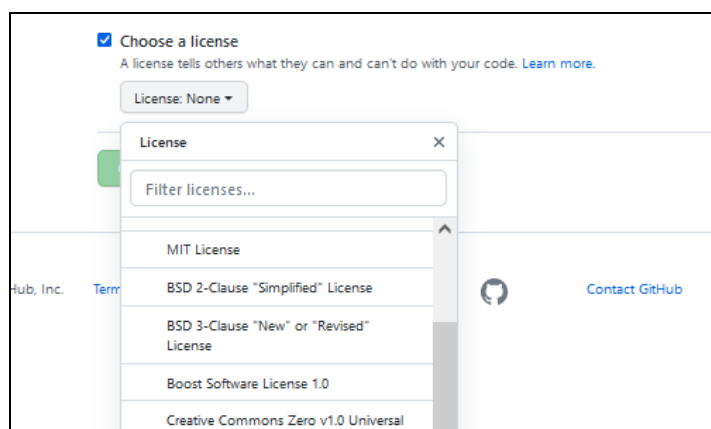

**Note 2 (Open Source, MIT License):** In this case, MIT retains copyright ownership, but makes the software openly available to the public without the requirement that redistribution of the software include the source code. MIT has approved open source distribution pursuant to the MIT License, which can be found at <https://opensource.org/licenses/MIT>. The license template at that website and the Copyright Notice (Note 5) should be included conspicuously within the released software copy and at the site where the software is downloaded (see Note 6 for Github instructions).

**Note 3 (Open Source, GPLv2 or LGPLv2 License):** In this case, MIT retains copyright ownership, but makes the software openly available to the public with the requirement that redistribution of the software (or any modification of the software) include the source code. MIT has approved this open source distribution pursuant to the GNU General Public License or the GNU Library Public License authored by the Free Software Foundation, which can be found at <http://www.opensource.org/licenses/gpl-license.php> and <http://www.opensource.org/licenses/lgpl-license.php>. Instructions for referral to the license terms in your software are available at those sites.

**Note 4 (Public Domain):** In this case, neither MIT nor the author(s) claim any copyright in the software code. Therefore, all references to MIT ownership and reservation of copyright should be removed from the released software copy. If some statement is required for clarity, the following language may be added: "Massachusetts Institute of Technology and the named authors assert no copyright ownership in this software."

**Note 5:** The copyright notice to be used with any license for MIT solely-owed software is "© Copyright <fill-in year or series of years> Massachusetts Institute of Technology." If there are joint owners/authors, they should also be included in this notice.

Note 6: If releasing your software on Github, it is recommended to post the selected license with your code so it is visible to those accessing your code. Instructions for adding a license can be found here: <https://docs.github.com/en/repositories/managing-your-repositorys-settings-and-features/customizing-your-repository/licensing-a-repository>. If you use the automated "Chose a License" option,

you will need to edit the Copyright notice that is auto-generated.

**Note 7:** MIT recognizes that other open source licensing mechanisms exist. If you desire a different open source licensing strategy, please confer with a Technology Licensing Officer at the Technology Licensing Office, 617-253-6966.
